

EXCELERATOR[®]

The Excel User Interface To Sage

Streamlining Business
Processes

Key Features

- **Increased productivity by 100%**
- **50% reduction in data processing costs reported**
- **Users can capitalise on their existing Excel skills. Existing spreadsheets supported**
- **Proven Solution: 1000+ Installed User Base**

Organisations everywhere are benefiting from the bi-directional, seamless integration of Excel and Sage, allowing them to automate and enhance their business processes. With a click of the mouse data from a spreadsheet updates the Sage database with full control and validation that follows the Sage business rules. The bi-directional nature not only permits the full control and validation, but allows journal numbers and batch numbers to be generated from within Sage and presented within the spreadsheet active at the time of integration.

The user friendly Spreadsheet Designer is provided with each module to create user-defined spreadsheet formats for data entry and upload to Sage. The user is not restricted to fixed format spreadsheets provided by the software author.

The powerful and flexible browse feature allows the user to search Sage for valid account codes and other data directly from in Excel, by a simple right click of the mouse on the field to be looked up. The search can be based on a number of fields and can include complex conditional criteria.

Excelerator has been developed over a number of years by experts in the fields of Business, Sage, Microsoft Office and User Interface Design. The four areas of expertise have been combined to create a powerful range of software that can deliver efficiency savings beyond user expectations.

Stock Master

The large number of installations and positive feedback from users are a testimony to the software's robust and user friendly nature. The software has led to substantial savings in business processes and empowered users to focus on value added analysis and control. The software utilises the functions, features and flexibility of Excel and the powerful control and validation of Sage.

Excelerator is a very useful tool. It has enabled the Society to make substantial savings in operator keying times and eliminated the need for special programming for the society's VAT

Don Collishaw
 Head of Finance
 RSPCA

Going forward Excelerator Stock Master has made a big difference to our finance team; a good product that is easy to use!
